

Deep Learning Mastery

Created by **N S Aishwarya**

CATEGORY

General

DIFFICULTY

Advanced

DURATION

25 Hours

PLATFORM

THE GATEHUB

Course Overview

Master Deep Learning from beginner to advanced level with practical projects and real-world applications

What You Will Learn

- Master Deep Learning from beginner to advanced level with practical projects and real-world applications

Table of Contents

Track 1: Neural Network Foundations

Module 1: Introduction to Deep Learning

Module 2: Convolutional Neural Networks

Module 3: Transformers and LLMs

Introduction to Transformers

Track 1: Neural Network Foundations

Learn the fundamentals of neural networks

Module 1: Introduction to Deep Learning

Understanding Deep Learning

Module 2: Convolutional Neural Networks

Computer Vision with CNNs

Module 3: Transformers and LLMs

Modern AI Architecture

Introduction to Transformers

Self Attention

Transformers use self-attention mechanisms to process sequences efficiently.

 **Video: Transformers Explained** (youtube)

CODING PRACTICE: TEXT GENERATION

Language: `python`

Exercise:

```
from transformers import pipeline
```

PROJECT: AI CHATBOT

DESCRIPTION

Build GPT Style Chatbot

INSTRUCTIONS

Create chatbot using HuggingFace Transformers

PROJECT LINKS

[Google Colab](#) | [GitHub Repository](#)

 **Downloadable Resource:** [TensorFlow Documentation](#)

 **Downloadable Resource:** [PyTorch Documentation](#)

 **Downloadable Resource:** [Hugging Face](#)

 **Downloadable Resource:** [Deep Learning Cheat Sheet](#)

FINAL EXAM: DEEP LEARNING MASTERY FINAL EXAMINATION

Duration: 180 Minutes

VIDEOS

 **Transformers Explained** (YouTube)

RESOURCES

-  **TensorFlow Documentation** (website)
-  **PyTorch Documentation** (website)
-  **Hugging Face** (website)
-  **Deep Learning Cheat Sheet** (download)

PROJECT: AI CHATBOT

DESCRIPTION
